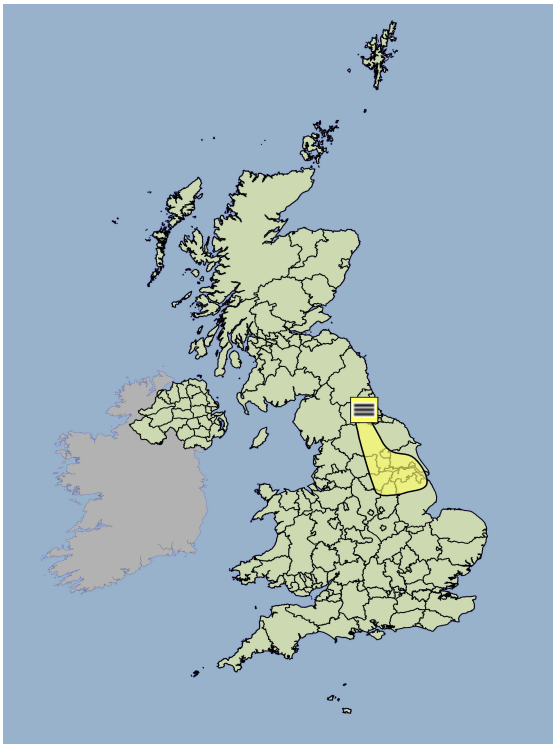
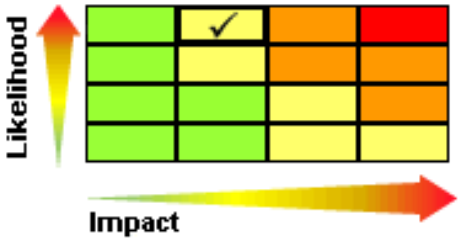
National Severe Weather Warning Service





Chief Forecasters Assessment
A ridge of high pressure across central areas of the UK is leading to light winds and clear spells overnight, which is a recipe, like recent nights, for areas of fog to develop. Some of these areas of fog are likely to be dense this morning and will take until late morning to clear in some places.

The Met Office have issued a **Yellow Warning** of **Fog**

Valid from **02:00 on Fri, 02nd Oct 2015** until **11:00 on Fri, 02nd Oct 2015**

Fog patches will become more widespread and dense in places over parts of NE England through Friday morning with visibility falling below 100 m in places. The fog will thin and slowly lift later Friday morning.

This will lead to difficult driving conditions and the public should be aware that some minor disruption is likely.
